

Control Station

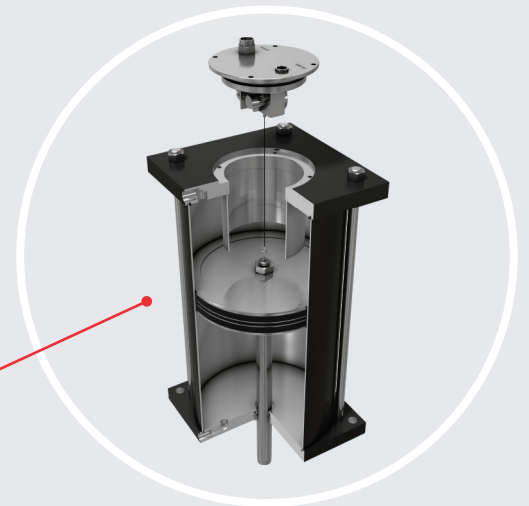

Cowan Pneumatic Control Panel

With and without
local manual override

Flotation Tank

Cowan AT Series

Pneumatic Modulating Actuator

Increased Yield:

- Maximize throughput by optimized control of the dart valves
- Closed loop control with compact design with self contained transducer
- Local control panel with closed-loop and manual position control

Reduced Maintenance

- Transducer is protected from the harsh environment
- No exposed transducer or clumsy linkage arms
- Modular transducer for easy installation and /or service
- Remote positioner simplifies operation and maintenance
